Innovative Resource Recovery

ENVIRONMENTAL POLICY

Envirostream Australia Pty Ltd provides end-of-life battery collection and processing solutions to safely recovery the materials to be used back into the manufacturing sector.

At Envirostream we pride ourselves on innovation to ensure maximum material recovery and minimal waste to landfill is achieved.

Envirostream is committed to managing our business and its operations in an environmentally responsible way with a focus toward emission reduction, minimising water usage and reducing waste to landfill.

To ensure that environmentally responsible behaviour is embraced as an integral part of our operations, we specifically undertake to:

- Conduct operations in compliance with relevant local environmental regulations, licences and all other requirements including our international obligations.
- Demonstrate, via external verification, compliance with approved industry standards.
- Put practices in place to monitor waste to landfill and put waste reduction initiatives in place.
- Put practices in place to monitor energy consumption and put energy reduction initiatives in place.
- Put practices in place to monitor water consumption and put water reduction initiatives in place.
- Identify and manage environmental risks to prevent pollution and achieve continual improvement of environmental performance through best practice.
- Continually assess, innovate and refine our practices to find better ways to recover resources from end-of-life batteries and increase the recycling rate of batteries in Australia.
- Ensure that our people, contractors and local community are aware of this policy and educate where required.

Through the implementation of Envirostream's Environmental Management Plan we will ensure that this policy, its purpose and outcomes are realised.

Andrew Mackenzie
Director
